1971-1984

Ministry of Economic Development
CENTRAL STATISTICS BUREAU

B.C. ECONOMIC ACCOUNTS

INTRODUCTION

The B.C. Economic Accounts present the principal estimates of aggregate economic activity for British Columbia for the period from 1971 to 1984. As consistent measures of the province's economic performance, these statistics provide the essential information for evaluating the pattern of economic growth in British Columbia. They provide a statistical overview of the key economic processes such as production, income generation and distribution, capital formation, consumption and trade flows, which facilitate the monitoring of the current economic environment; and, in addition, contain important information as to the relative growth of various industrial sectors over time. From this information it is possible to discern the cyclical pattern of economic growth and identify ongoing structural changes in the economic base of British Columbia.

The publication is divided into five main sections. The first section contains the annual current dollar estimates for the income, expenditure, and industry accounts as well as consolidated accounts for the Federal and Provincial Governments and for Corporate and Government Business Enterprises. The second section contains the quarterly current dollar estimates, while the third section presents the expenditure and industry estimates in constant 1971 dollars. Section four presents the constant dollar estimates in seasonally adjusted form; the final section consists of the implicit price indices and their respective percentage changes which were used for deflation. The Accounts conclude with a Glossary of Terms.

The Central Statistics Bureau welcomes questions and comments regarding the B.C. Economic Accounts and for those interested, an outline of the methodology is available upon request. Questions and comments should be directed to:

Central Statistics Bureau

Ministry of Economic Devlopment

2nd Floor, 1405 Douglas Street

Victoria, British Columbia

V8W 3C1

Telephone: (604) 387-0368

In response to a number of requests by users of the *B.C. Economic Accounts*, the Central Statistics Bureau is now providing the data in machine-readable form. The data are in Data Interchange Format (DIF) and are compatible with personal computer software such as LOTUS 1-2-3, FRAMEWORK, VISI-CALC, SYMPHONY, dBASE III and most regression packages. There is a nominal charge of $75.00

Please make cheques payable to:

Minister of Finance

For further information on compatibility or to request a copy of the "Accounts", please contact:

Non-Commercial Services - Total	100.0	109.3	122.9	140.0	167.9	185.3	198.8
Education & Related Services	100.0	111.9	127.8	142.4	172.4	189.9	205.5
Health & Welfare Services	100.0	106.9	118.9	138.0	164.5	181.2	193.0
Other Non-Comm. Services	100.0	105.2	112.6	135.1	154.5	177.3	188.3
Public Admin. and Defence	100.0	109.1	117.7	140.6	159.9	178.2	198.1
Gross Domestic Product at Factor Cost[2]	100.0	107.0	122.4	139.7	156.7	173.3	185.3

[1] Includes clothing, textiles, knitting, rubber, plastics and leather

[2] The GDP deflator does not exactly match the GDE deflator because of the inclusion of indirect taxes less subsidies.

Implicit price indices are developed and applied to current dollar data on a quarterly basis.

Annual deflators are the average of quarterly deflators.

GLOSSARY OF TERMS

• 1. ADJUSTMENT FOR GRAIN TRANSACTIONS

The Canadian Wheat Board makes payments to producers in the current year on crops delivered in the previous year. Since the Income Account is a measure of the earnings arising out of current production rather than actual cash receipts, adjustments have to be made. A second portion of this adjustment allows for the fact that the earnings of the CWB are calculated on the basis of the change in book values of inventories, whereas the required valuation of inventories for the accounts is the value of physical change. Negative values occur when CWB payments to farmers in a given year are higher than the actual value of grain produced in that year.

• 2. BUSINESS INCOME

Defined as the summation of net income of non-farm unincorporated businesses (including rent), net income received by farm operators, corporation profits before taxes, inventory valuation adjustments and capital consumption allowances.

• 3. CAPITAL ASSISTANCE

Capital assistance consists of grants by federal and provincial governments to incorporated and unincorporated businesses with the aim of assisting construction of new facilities or the acquisition of new production machinery and equipment.

• 4. CAPITAL CONSUMPTION ALLOWANCES

Applicable to both government and business, this item has two components: an allowance for depreciation or wearing out of fixed capital assets in the economy; and various valuation adjustments arising from differences in the concepts of income and capital consumption as reflected in business accounting records and as used in the National Accounts.

• 5. CORPORATION PROFITS BEFORE TAXES

This component is calculated before payment of dividends and before deduction of income and excess profits taxes, depletion allowances and charitable donations. Due to the complexity of this item, readers desiring a more complete description and derivation of corporate profits are referred to Chapter 7, National Income and Expenditure Accounts, Statistics Canada, 1975, Catalogue No. 13-549E.

• 6. CURRENT GOVERNMENT EXPENDITURES ON GOODS AND SERVICES

This component consists of the non-investment expenditures of the federal, provincial and local governments and hospitals. It includes general administrative expenses, such as wages and salaries, as well as outlays for goods and other services required in discharging governmental responsibilites. Thus, it consists of purchases from businesses and non-residents, wages and salaries of government employees, medical care expenditures, capital consumption allowances and other miscellaneous expenditures, but does not include any expenditures in the form of capital investment.

• 7. CURRENT TRANSFERS

Current transfers are transfers of income between transactors where the transfers are made from the current income of the payer and added to the current income of the recipient. The main distinction between a transfer payment and the purchase of a good or service is that with a transfer payment, there is no direct link between payment and services received.

a) Current transfers to business from persons

This is the non-productive or transfer portion of interest on the consumer debt. It is equal to total interest on the consumer debt less administrative charges.

b) Current transfers to government from persons

Transfers to Government includes "Direct Taxes" and "Other Current Transfers to Government". See the relevant headings for further explanation of these terms.

c) Current transfers to non-residents from persons

This includes personal remittances to non-resident governments, corporations, and persons.

d) Current transfers to persons from business

Payments classified under this heading refer to: (i) charitable and other contributions from corporations to persons and unincorported business; and (ii) bad debt allowances, that is, the amounts charged by businesses in respect to doubtful accounts, net of recoveries.

e) Current transfers to persons from government

An expenditure of the federal, provincial and local governments, these transfers encompass all direct payments from governments to persons. Included in this component are such items as family and youth allowances, unemployment insurance benefits, workers' compensation benefits, general welfare payments, old age security benefits, Canada Pension Plan benefits, and public service pension benefits. Excluded are tax refunds or rebates.

f) Current transfers to persons from non-residents

This refers to items such as pensions paid by foreign governments, cash payments by relative or friends living in other countries, and charitable contributions made by non-resident corporations.

• 8. DEPRECIATION

Depreciation is the actual wear and tear and obsolescence of fixed capital assets in the process of economic production. It comprises the major part of Capital Consumption Allowances.

• 9. DIRECT TAXES

Direct taxes are taxes levied directly on income. They do not include taxes on capital, sales, property or the like. They do include taxes on various forms of income, such as profits, wages, interest and dividends.

a) Business enterprises

This item encompasses three components: general income taxes, mining and logging taxes and other direct taxes. These taxes are levied on profits of private and government business enterprises and are collected by the federal and provincial governments.

b) Non-residents

These are taxes levied by the federal government on payments to non-residents of such items as dividends, interest, royalties, management fees, etc.

c) Persons

This component encompasses such items as personal income taxes, employer and employee contributions to social insurance programmes, employer and employee contributions to non-trusteed public service pension plans, and employer and employee contributions to the Canada Pension Plan. Direct taxes assessed against individuals usually take some account of ability to pay and are collected by both the federal and provincial governments.

• 10. GROSS DOMESTIC EXPENDITURE

Gross Domestic Expenditure is a measure of total expenditures within the economy, including imports and exports of goods and services. By definition, GDE is equal to GDP at market prices since total incomes are either consumed, saved (invested) or taxed.

• 11. GROSS DOMESTIC PRODUCT AT FACTOR COSTS

Gross Domestic Product at Factor Cost is a measure of income accruing to the factors of production (land, labour and capital) including depreciation of capital assets (Capital Consumption Allowances). It does not include incomes that accrue to the non- factor or invisible components of GDP (see GDP at Market Prices). Thus GDP at Factor Cost can be derived from GDP at Market Prices by subtracting indirect taxes less subsidies.

• 12. GROSS DOMESTIC PRODUCT AT MARKET PRICES

Gross Domestic Product at Market Prices is a concept that measures total production based on the earnings of the factors of production (factor cost) plus the non-factor costs of production (indirect taxes less subsidies). Since this is a measure of production, it does not include transfer payments (see Current Transfers).

• 13. GROSS DOMESTIC PRODUCT (GDP) IN CONSTANT DOLLARS

This is a measure of total production during a given time frame in a given geographical location, valued in base year prices. For British Columbia, the base year is 1971.

• 14. GROSS DOMESTIC PRODUCT (GDP) IN CURRENT DOLLARS

This refers to the value of total production within a given geographical area for a specific time period, and is measured in prices which prevail during the period being valued. It includes output that is produced by capital stock which is owned by non- residents of the region, but it does not include income received by residents on production which takes place outside the region. Thus GDP is strictly a measure of production within a specific region, regardless of ownership of the factors of production.

• 15. GROSS FIXED CAPITAL FORMATION

Government and business gross fixed capital formation is defined to include expenditures by government and business for new construction and new machinery and equipment. Expenditures of persons for new residential dwellings are also included, since individuals, in their capacity as home-owners, are treated as business enterprises. Only new construction and new machinery and equipment are included; purchases of land, used buildings, and second-hand machinery and equipment are excluded since they do not represent current production of goods and services.

- **16. GROSS PROVINCIAL PRODUCT (GPP)**

As opposed to GDP, this item measures the total value of production attributable to the residents of a given region during a particular time frame, regardless of where that production takes place. Thus GPP at Market Prices equals GDP at Market Prices plus investment income recovered from non-residents less investment income paid to non-residents.

- **17. IMPLICIT PRICE INDICES**

These are current-weighted price indices which measure yearly changes in prices as well as changes in expenditure or production patterns between items. The expenditure price indices are calculated by dividing the current dollar values of the components of Gross Domestic Expenditure by their deflated constant dollar series. The GDP by industry price indices are likewise calculated by dividing the current dollar values of the industry accounts by their respective deflated constant dollar estimates.

- **18. INDIRECT TAXES**

These are taxes levied by the federal, provincial and local governments, which represent a part of the market price of goods and services but which is not received by factors of production. They maybe imposed on the production and/or sale of goods and services or they may be levied in accordance with formulae which take account of certain capital holdings (e.g. real property). They may also take the form of charges for the right to engage in certain activities of a personal, professional, industrial or commercial nature. Indirect taxes include such components as manufacturers' sales tax (federal), retail sales taxes (provincial), customs duties, excise duties and taxes (including oil export charges), natural resource taxes, real property taxes, amusement taxes and profits of liquor boards. Indirect taxes, however, exclude the sales of oil and gas rights.

- **19. INTEREST, DIVIDENDS AND MISCELLANEOUS INVESTMENT INCOME**

This category is a measure of the interest income of persons and unincorporated business. It includes bank, mortgage and bond interest, both paid and imputed. It also includes royalties received by persons and interest received on Canadian bond holdings, the investment income of life insurance companies and fraternal organizations, and interest and dividends received from the corporate and government business enterprise sector as well as the non-resident sector of the accounts. It does not include interest on the public debt nor interest on consumer debt.

- **20. INTEREST, DIVIDENDS AND MISCELLANEOUS INVESTMENT INCOME FROM NON-RESIDENTS OF CANADA**

Miscellaneous investment income from non-residents includes dividend, interest and business service payments to British Columbia businesses. Business service payments include rent, royalties, advertising, research, insurance and management fees. For the provincial accounts there should be two components for payments from non- residents: payments from non-Canadians and payments from Canadians but non-British Columbians. Because the data for interprovincial payments are not available at present, the component "payments from Canadians excluding British Columbians" is not estimated.

- **21. INTEREST ON THE PUBLIC DEBT**

This is an expenditure item for all levies of government and hospitals, consisting of payments made in respect of their borrowed funds.

- **22. INVENTORY VALUATION ADJUSTMENT**

The inventory valuation adjustment is the difference between the value of physical change in inventory and the change in inventory book value. The adjustment is made from corporation profits and the net income of unincorporated businesses, in order to remove any unrealized gains or losses arising from the effect of price changes on holding of inventories. Since the method of calculating farm income automatically eliminates such gains or losses, this adjustment is required only for business inventories and grain in commercial channels other than the Canadian Wheat Board.

- **23. INVESTMENT INCOME (GOVERNMENT)**

A revenue source for the federal, provincial and local governments and hospitals, investment income includes such items as interest on government-held public funds, interest on loans, advances and other investments, royalties, sale of oil and gas rights and remittances from government enterprises.

- **24. LABOUR INCOME**

Labour income is defined at the summation of wages and salaries, supplementary labour income, and military pay and allowances.

- **25. MERCHANDISE EXPORTS -R.O.C. and R.O.W.**

  Merchandise exports to the rest of Canada and to the rest of the World include all receipts from exports of goods (priced at producer prices), excluding transportation, storage and loading costs and all levied taxes.

- **26. MERCHANDISE IMPORTS -R.O.C. and R.O.W.**

  Merchandise imports from the rest of Canada and from the rest of the World include all payments for imports of goods (priced at producer prices), excluding transportation, storage and loading costs and all levied taxes.

- **27. MILITARY PAY AND ALLOWANCES**

  This includes wages and salaries paid to members of the armed forces as well as supplementary payments such as employer contributions to pension funds. The value of uniforms, free medical examinations, food supplied to personnel and provision of living quarters to personnel is not included.

- **28. MISCELLANEOUS INVESTMENT INCOME**

  This component comprises all investment income of persons, unincorporated and incorporated business and government, excluding dividend payments from corporations. Dividends are implicitly accounted for in the corporate profits before taxes component.

- **29. NET DOMESTIC INCOME AT FACTOR COST**

  This is the sum of the earnings of the factors of production, namely, land, labour and capital excluding capital consumption allowances. It is calculated on a domestic basis since these components are the earnings arising from production within the boundaries of British Columbia.

• 30. NET EXPORTS OF SERVICES PLUS RESIDUAL ERROR

Due to the difficulties encountered with estimating international and interprovincial flows of services, this item is calculated (together with a residual error) as the difference between total GDP at market prices defined in the income accounts and the sum of the expenditure account components.

Since this item includes a residual error, it should not be viewed as a reliable estimate of net service exports. However, the general pattern of increasing net exports of services during periods of low or negative growth and decreasing net exports of service during periods of relatively high growth is consistent with economic theory.

• 31. NET INCOME OF NON-FARM UNINCORPORATED BUSINESS

This item includes the net income of all non-farm unincorporated businesses covering almost every industry in the economy including the net income of independent professional practitioners, such as doctors, dentists, nurses, lawyers and engineers. It also includes the rental incomes of persons.

• 32. NET INCOME RECEIVED BY FARM OPERATORS

This item comprises cash receipts from the sale of farm products, the imputed value of goods consumed by farm families, supplementary farm payments, and the value of inventory changes (except depreciation on residential dwellings). Negative values occur when the value of the depletion of inventories and operating expenses exceeds cash receipts and supplementary payments. Adjustments for grain transactions are excluded.

• 33. OTHER CURRENT TRANSFERS FROM PERSONS TO GOVERNMENT

A revenue item for the federal, provincial and local governments, these transfers involve direct remittances from persons to government. Unlike direct taxes, transfer payments are not usually related to the ability to pay. They also involve less compulsion and greater freedom of choice than direct taxes. Included in this component are such items as motor vehicle licenses and permits (personal purposes only), contributions to hospital and medical care insurance, game licenses, marriage licenses, birth and death certificates and fines and penalties.

- **34. PAYMENTS TO NON-RESIDENTS**

Payments to non-residents include dividend, interest and business service payments. Business service payments include rent, royalties, advertising, insurance, research and management fees. As explained in the item Miscellaneous Investment Income from Non-Residents, only the Payments to Non-Canadians component is estimated. Net payments to Canadians but non-British Columbians are not derived.

- **35. PERSONAL DISPOSABLE INCOME**

This equals personal income minus direct taxes and other current transfers from persons to government.

- **36. PERSONAL INCOME**

This is a measure of all income received by persons in British Columbia. It includes wages, salaries and supplementary labour income; military pay and allowances; net income of non-farm unincorporated business, (including rent); net income received by farm operators from farm production (excluding the adjustment on grain transactions); interest, dividends, and miscellaneous investment income; and all transfer payments received by persons.

- **37. PERSONAL SAVINGS**

Personal savings are primarily determined residually by subtracting total personal consumption from personal disposible income. This residual total is then adjusted to include the value of physical change in farm inventories and the value of personal (non-farm) savings. Personal Savings also include the change in book value of unincorporated business inventories.

• 38. PRODUCTION

Production is the creation of goods and services on which members of the community, or the community as a whole, set a dollar value. Any process that creates or adds value to already existing goods is production. For example, the activities of labourers and entrepreneurs who produce and sell the entire range of goods and services; the activities of doctors, lawyers, entertainers, dry cleaners and all who provide services to households and businesses; and the activities of government are all production. In various ways, they create or improve goods and services, and hence add economic value. Also included in production is "income in kind" which refers to such items as the value of food consumed on farms and the imputed value of free lodging provided by employers. Excluded are illegal activites and the sale of previously owned assets. However, the gain or profit in selling used assets is included in production.

• 39. PERSONAL EXPENDITURES ON GOODS AND SERVICES

Personal expenditures on goods and services include all purchases made by persons in British Columbia netting out expenditures made by non-residents. This netting out prevents any double-counting since these expenditures are already included as positive entries in exports of goods and services. Personal expenditure is broken down into the following categories:

(i) Durable Goods :

This item refers to goods obtained by persons which have an expected long life-time of use and involve a substantial sum of money to purchase. It includes items such as automobiles, recreation equipment and appliances.

(ii) Semi-Durable Goods :

These are goods which can be used for a period of time of a year or more but do not involve large sums of money to purchase. It includes items such as clothing, footwear, linens and kitchenware.

(iii) Non-Durable Goods :

These are goods with an expected life-time of less than one year. It includes items such as food and beverages, gasoline, electricity and natural gas.

(iv) Services :

This item covers personal expenditure on a broad variety of services ranging from rent paid and imputed on dwellings to transportation, recreation or personal care services.

- **40. RESOURCE EXPORT INDUSTRIES**

  This grouping is defined to include the following industries: forestry; fishing; mining; fish products; wood manufacturing; paper and allied; and primary metals.

- **41. SERVICE INDUSTRIES**

  This grouping is defined to include the following industries: transportation, storage and communications; retail and wholesale trade; finance, insurance and real estate; community, business and personal services; and public administration.

- **42. SUBSIDIES**

  An expenditure item of the federal and provincial governments, subsidies represent payments made by governments to business toward current costs of production, whether this be at the producer or distributor level. Subsidies may be made to agriculture (for example, Canadian Dairy Commission Payments), transportation (such as, payments to railways under the National Transportation Act), and communications, among others.

- **43. SUPPLEMENTARY LABOUR INCOME**

  This covers payments made by employers on behalf of employees and can be considered as payment for the services of employees. It includes employers' contributions to unemployment insurance, welfare funds and workers' compensation.

- **44. UNDISTRIBUTED CORPORATION PROFITS**

  Undistributed corporation profits is the residual after deducting corporation income tax, dividends paid to non-residents, dividends paid to Canadian residents and current transfers to persons from corporate profits before taxes.

- **45. VALUE ADDED**

  The value added by an industry is the difference between the gross value of production of that industry less the total value of purchases (including imports) of goods and services from other firms which enter into that industry's production process (i.e., intermediate goods and services). If we sum up value added for all industries in British Columbia, we should arrive at GDP at factor cost by industry.

• 46. VALUE OF PHYSICAL CHANGE IN INVENTORIES

Value of physical change in inventories is defined as the change in the physical volume of non-farm business inventories, valued at the average market prices of the period. It is necessary that the net change in business holdings of inventories during the year be included in the Gross Domestic Product to take into account that portion of current production which has not yet been sold (positive change in inventories), as well as to eliminate that portion of the previous year's production which is included in current sales (negative change in inventories).

• 47. WAGES AND SALARIES

This refers to direct payments other than pensions made to employees. It is calculated before deductions are made for contributions to social security, taxes and so on. It also includes income in kind, such as free lodging. Retroactive payments are included in the period of payment rather than in the period of earning.
